Education

Ramaiah Institute of Technology <i>Bachelor of Engineering – Information Science and Engineering CGPA: 8.7</i>	2024 – 2027
Government Polytechnic College Harapanahalli <i>Diploma in Computer Science Engineering (CSE) CGPA: 9.36</i>	2021 – 2023
Moraji Desai Residential School <i>Karnataka SSLC (Class 10) Percentage: 92%</i>	2020 – 2021

Technical Skills

Programming Languages: Java, Python, HTML, CSS

Frameworks & Libraries: Streamlit, Pandas, NumPy

Databases: MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Machine Learning, IoT, Data Analysis, Computer Networks

Visualization: Power BI, Matplotlib

Tools & Technologies: Git, GitHub, Docker, Arduino IDE

Projects

RIDONEX: Smart Helmet System - Developed a next-gen smart helmet system for rider safety with real-time monitoring and crash detection. - Implemented helmet wear detection, drowsiness detection, and alcohol level safety monitoring. - Integrated dual ESP32 controllers with multiple sensors and a Spring Boot backend for mobile analytics.	2025
Human Eye Disease Prediction System (OCT Analysis) - Developed a deep learning web app using TensorFlow and Streamlit to classify retinal OCT images into CNV, DME, Drusen, and Normal categories. - Built and trained a MobileNetV2 model on a dataset of 84,000+ medical images, achieving high classification accuracy. - Implemented end-to-end solution including image upload, preprocessing, model prediction, and an interactive medical recommendation. - Designed a user-friendly interface for retinal disease detection and analysis.	2025
Crop Recommendation System (Machine Learning) - Developed a machine learning application to recommend the most suitable crop based on soil and environmental parameters. - Collected and preprocessed data including N, P, K, temperature, humidity, pH, and rainfall. - Built and trained a predictive model using Scikit-learn (Random Forest Classifier) for accurate crop prediction. - Developed a web interface using Flask for real-time user input and crop recommendation. - Helps farmers make data-driven decisions to improve crop yield and productivity.	2025

Internship

Cyber Security Internship - Gained hands-on experience in network security, vulnerability assessment, and penetration testing. - Worked with tools like Wireshark and Nmap for system analysis and threat detection. - Strengthened knowledge of firewalls, encryption, and secure coding practices.	2025
--	------

Achievements & Certifications

- Secured 1st place in "Tech Tank" at RIT TechFest 2026.
- Volunteer – TCS World 10K Bengaluru 2026, recognized by Youth for Seva for commitment towards supporting the event.
- Volunteer – NSS RIT 27th Annual Blood Donation Camp 2025, organized by Ramaiah Institute of Technology (Nov–Dec 2025).
- Introduction to Front-End and Back-End Development (Online Certification).
- Artificial Intelligence: Concepts and Techniques (NPTEL Course).
- Machine Learning Concepts (NPTEL Course).
